

# Automate Complete

IT and business process automation are more essential than ever for enabling efficiency and gaining a competitive edge. Automate Complete is a comprehensive suite of automation solutions designed to meet any enterprise automation need, from robotic process automation to backend system automation to IT job scheduling.

As a highly scalable platform, Automate Complete gives you the scope and flexibility you need to strategically meet business objectives. Start with your current automation goals and Automate Complete will easily and cost-effectively scale to any future requirements.

Automate products streamline processes for the whole organization, not just the IT department. By integrating the best of IT process automation and application integration, Automate Complete helps bring IT and business users into closer alignment, eliminating the struggle between operations and development.

## Automate

Achieving personnel productivity is simple with Automate's drag-and-drop building blocks and an interface intuitive for business and IT users alike. Quickly and easily configure a software robot to streamline repeated tasks for you and your team, bringing value to the business in hours, not weeks.

## Automate Enterprise

Strategically tie the entire automation landscape together to power your IT and business operations. Automate Enterprise is scalable enterprise automation software designed to integrate frontend and backend automated workflows across your organization. With a truly enterprise-class automation solution, you will meet internal and external SLAs, enable DevOps, and achieve regulatory compliance.

## Automate Schedule

Enterprise job scheduling allows you to automate key processes across multiple platforms and teams while maximizing the ROI of your existing applications. With a wide variety of scheduling options to choose from and support for event-driven workflows and alternate reactive paths, you're no longer limited to running jobs at the same time every day. Automate Schedule helps enterprises streamline operations and centralize control over Windows, UNIX, Linux, and IBM i systems.

## PRODUCT SUMMARY

### KEY FEATURES

- Drag-and-drop task development
- Event-based triggers and conditions
- Database connectivity
- Event and task execution logging
- Error condition handling and recovery
- File manipulation
- FTP/SFTP automation
- Multi-machine execution
- OpenDocument spreadsheet automation
- Terminal emulation
- Web services

### INTEGRATIONS

- Amazon Web Services
- Windows Azure
- VMware
- SharePoint
- Microsoft Exchange
- Excel
- Oracle
- MySQL
- Active Directory
- XML
- Windows PowerShell
- Microsoft Dynamics

### MINIMUM SYSTEM REQUIREMENTS

**Operating System:** Windows 2003

**Processor:** 2 GHz

**Memory:** 4GB RAM

**Display:** 1280x1024 resolution, 32 MB video RAM

**Hard Drive:** 5GB available hard disk space
